What happened yesterday

Around 1000: the *Casanova* anchored in Venice lagoon. It is too big to come close in to the harbor, so travel to and from the city is via small boats. It has one dinghy itself, which any of the passengers can pilot: and also water-taxis can be summoned at any time.

1000–1900: various people went to run personal errands in the city, but most stayed aboard the yacht.

2000: everyone traveled from the *Casanova* into the city to attend the film festival awards and gala dinner.

0000: the dinner event finished.

0100: by this time, everyone except Clay (who had decided to remain in the city for more drinking) was back on board the *Casanova*. The crew retired for the night; so, after this time, it is not known who may have gone from the yacht to the city, or vice versa, whether by dinghy or by water-taxi.

0430–0500: at some point in this period, Clay was killed, in St Mark's Square in the centre of the city.

0715: Clay's body was found. The police investigation started.

Now: Clay's death has been linked to the *Casanova*, traces of his blood have been found in its dinghy, and everyone has been confined to their cabins.
